
(a) all games
p = 0.51
replicated data sets
White win share
(b) between openings with ≥ 30 games
p = 0.15
replicated data sets
standard deviation of White win share
(c) by rating gap
replicated, 90% interval
observed
White win share minus
replicated mean (percentage points)
-1605 to -274
-274 to -146
-146 to -76
-76 to -29
-29 to 3
3 to 39
39 to 88
88 to 161
161 to 286
286 to 1499
rating gap, White minus Black (points)
(d) discrepancy over the bins of (c)
p = 0.026
